Engineering overview

Automated dry-mix mortar production systems designed around accurate dosing, controlled handling and flexible product changeover.

Key capabilities

- 5-50 TPH published capacity range
- Tower and horizontal configurations
- Accurate material dosing and handling
- Production management information
- Flexible multi-product operation

Dry Mix Mortar Plants

Illustrative source asset

Source basis: Buildmate Dry Mix Plants page and published brochure library

Technical notes

01 Capacity and layouts

The current Buildmate source publishes a capacity range of 5-50 TPH and describes tower and horizontal plant layouts.

02 Product applications

Published applications include thin-bed joining mortar, masonry mortar, rendering mortars, internal and external plasters, decorative products, tile/slab plasters, waterproofing products and weatherproof systems.

Verified source basis: Buildmate Dry Mix Plants page and published brochure library

Technical notes

03 Process priorities

The source highlights automation, production-management data, high accuracy, reduced handling and operating costs, lower power demand and flexible product ranges.

04 Project integration

Dry-mix plants can form part of larger building-material projects alongside AAC, concrete-block, precast and other material-production systems.
