

PRECAST PRODUCTION

PRECAST CONCRETE PLANTS

Precast production systems for walls, slabs, columns, beams, single-T and double-T elements, with plant concepts tailored to the required product mix.

ONE-POINT

SOLUTION

concept to commissioning

Engineering overview

Precast production systems for walls, slabs, columns, beams, single-T and double-T elements, with plant concepts tailored to the required product mix.

Key capabilities

- Walls, slabs, columns and beams
- Tilting tables and precision mould systems
- 3D bathroom/kitchen pod capability
- Curing and material-handling integration
- Concept-to-commissioning support

Precast Concrete Plants

Illustrative source asset

Source basis: Buildmate Precast Concrete page and published precast brochures

Technical notes

01 Plant scope

Buildmate describes customized precast plants covering stationary beds, tilting tables, column and beam moulds, staircase moulds, hollow-core production, battery moulds and 3D moulds.

02 Smart production concepts

Current source material describes VTC line-production moulds, hybrid casting beds, 3D volume pod moulds, shuttle-type battery moulds, hollow-core individual-table production and carousel plants.

Verified source basis: Buildmate Precast Concrete page and published precast brochures

Technical notes

03 Integrated packages

Buildmate can combine batching, material handling and cranes, PEB shed solutions and curing systems with precast production equipment.

04 Startup/site option

The published precast brochure describes startup/site-based plants intended to test markets with lower initial investment, including slabs, solid walls and multilayer panels.

Verified source basis: Buildmate Precast Concrete page and published precast brochures

Project discussion

Share the target product, required output, raw-material route, site location and project stage for a technical discussion.
