

AGGREGATE PROCESSING

STONE CRUSHING PLANTS

Crushing and screening solutions for aggregate production, with primary, secondary and tertiary equipment selected for material, throughput and product specification.

JAW

PRIMARY

crushing

CONE

SECONDARY

reduction

VSI

TERTIARY

sand making

Engineering overview

Crushing and screening solutions for aggregate production, with primary, secondary and tertiary equipment selected for material, throughput and product specification.

Key capabilities

- Primary, secondary and tertiary crushing
- Jaw, cone, VSI and impact options
- Circular-motion screening
- Controlled vibro feeding
- Process-oriented plant configuration

Stone Crushing Plants

Illustrative source asset

Source basis: Buildmate Crusher Plants, Vibrating Screens and Vibro Feeders pages

Technical notes

01 Process equipment

Buildmate material covers jaw crushers, cone crushers, VSI crushers, horizontal-shaft impact crushers, vibrating screens, vibro feeders and grizzly feeders.

02 Screening

Circular-motion vibrating screens are described for heavy-duty, medium and fine screening after primary, secondary and tertiary crushing.

Technical notes

03 Feeding

Vibro feeders are described for regulated, continuous feed into secondary cone and impact crushers and tertiary sand-making equipment.

04 Plant engineering

Crushing circuits should be selected around feed size, material abrasiveness, target products, throughput and desired screening fractions.

Project discussion

Share the target product, required output, raw-material route, site location and project stage for a technical discussion.
