Engineering overview

Automated batching systems in Standard and Tech series configurations, with multiple capacities, layouts and mixer arrangements.

Key capabilities

- Standard and Tech series
- 30-120 m³/h published series capacities
- Compact, horizontal, tower and mobile layouts
- Twin-shaft and other mixer options
- HMI and MIS-oriented control

Concrete Batching Plants

Illustrative source asset

Source basis: Buildmate Concrete Batching Plants published brochure and current batching page

Technical notes

01 Plant series

Buildmate source describes Standard and Tech series plants in 30, 60, 90 and 120 m³/h capacities. Tech adds MIS reporting, innovative layouts and optional features.

02 Material flow

Aggregate hoppers feed a weigh conveyor on load cells, followed by inclined conveying into a mixer or holding hopper. Cement, water and admixture are separately weighed.

Verified source basis: Buildmate Concrete Batching Plants published brochure and current batching page

Technical notes

03 Automation

A site control cabin houses electrical panels, control software and HMI equipment to operate the plant.

04 Models and parameters

The source brochure lists BM 500 TS, BM 1000 TS, BM 2000 TS and BM 3000 TS, with hopper, conveyor, mixer, water and admixture parameters.
