Engineering overview

Material-handling and pre-engineered building solutions for industrial facilities, combining crane systems with structural and project-engineering support.

Key capabilities

- Automated Gantry/EOT/Tower crane solutions
- In-house crane design and quality control
- Lightweight steel PEB structures
- Industrial and warehouse applications
- Project customization and EPC capability

Cranes & PEBs

Illustrative source asset

Source basis: Buildmate Cranes and Pre Engineered Buildings pages

Technical notes

01 Crane systems

Buildmate current material describes automated Gantry, EOT and Tower cranes, with in-house design and specialised solutions for complicated applications.

02 PEB systems

Buildmate describes lightweight steel PEB systems for industrial buildings, warehouses, sheds, auditoriums, offices and factories.

Technical notes

03 Published benefits

Source material lists low initial cost, better quality, fast construction, low maintenance and resourceful system design.

04 Integrated responsibility

Buildmate states that complicated customer requirements can be taken through understanding the need to commissioning, including EPC-style PEB work.

Project discussion

Share the target product, required output, raw-material route, site location and project stage for a technical discussion.
