Engineering overview

A focused mixer portfolio for powder, semi-dry and concrete applications, combining robust mechanical construction with hydraulic and electronic control.

Key capabilities

- Pan, ribbon, blender, twin-shaft and planetary
- Hydraulic control and electronic systems
- Low routine maintenance focus
- Semi-dry and concrete mixing applications
- Application-specific equipment selection

Mixers

Illustrative source asset

Source basis: Buildmate Mixers current product page

Technical notes

01 Published families

Buildmate currently lists Pan Mixers, Ribbon Mixers, Blenders, Twin Shaft Mixers and Planetary Mixers.

02 Pan mixers

The source describes robust pan mixers for aggregate, cement and water, including semi-dry mixes used in concrete brick, paver and block production.

Verified source basis: Buildmate Mixers current product page

Technical notes

03 Ribbon and blender systems

Ribbon mixers are described for rapid powder movement and short mixing times; blender products are offered for varied material requirements.

04 Twin-shaft and planetary

Twin-shaft mixers are positioned for fast, complete concrete mixing and retrofit applications. Planetary mixers are described for viscous or powder-rich products.

Project discussion

Share the target product, required output, raw-material route, site location and project stage for a technical discussion.
